Harlin Acero

Senior Full Stack .NET Developer | C# · ASP.NET Core · Angular · SQL Server · Azure · Microservices

Bogotá, Colombia · harlinacero@gmail.com · linkedin.com/in/harlinacero

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 10+ years of experience, 9 of them building .NET applications (C#, ASP.NET Core, Entity Framework Core) with Angular and React frontends, RESTful APIs, SQL Server and Azure. Experience with microservices and event-driven architectures (Kafka, Azure Service Bus), Docker and Kubernetes, CI/CD with Azure DevOps, and automated testing (xUnit, integration, JMeter). Led 6+ developers, mentored engineers, ran code reviews and worked in agile teams. Seeking long-term remote roles.

TECHNICAL SKILLS

Leadership: Mentoring, code reviews, technical design, architecture decisions, on-call and incident response, engineering standards

Languages & frameworks: C#, .NET (.NET Framework 4 to .NET 10), ASP.NET Core, ASP.NET MVC / Razor, Entity Framework Core, TypeScript, Angular, React, HTML5, CSS3, LINQ, Java, Spring Boot, Python (scripting)

Architecture: Microservices, event-driven architecture, distributed systems, Clean Architecture, design patterns, REST, gRPC, API Gateway

Messaging & data: Kafka, Azure Service Bus, RabbitMQ, SQL Server, Azure SQL Database, PostgreSQL, BigQuery

Cloud & DevOps: Azure (Functions, Key Vault, Azure SQL, Service Bus, DevOps), Docker, Kubernetes, CI/CD, GitHub Actions, SonarQube

Observability & BI: Datadog and Grafana (dashboards, metrics and log analysis), ELK Stack, Looker Studio

Testing: xUnit, JUnit, Jasmine (Angular unit tests), integration testing, JMeter (load and stress)

Security: JWT, OAuth2, Azure Key Vault secrets management and rotation, SonarQube

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Mercado Libre Apr 2025 – Sep 2026

Catalog & Buybox team · Bogotá, Colombia

- Developed and evolved Java/Spring Boot microservices that match seller listings with products on the marketplace storefront.
- Led the productization project end to end, from requirements to production monitoring, operating processes with peaks of 60,000 per day, all executed successfully.
- Built the results-measurement layer for an asynchronous process: Python scripts, BigQuery and a Looker Studio dashboard refreshed 3 times a day, where there was no visibility before.
- Worked with queues and streaming (Fury) in a distributed, event-driven microservices architecture; integrated NoSQL sources into read-only BigQuery tables.
- Monitored production with APM platforms (Datadog, Grafana): built dashboards, analyzed metrics and logs.
- Took part in the 24/7 on-call rotation (one week roughly every four weeks): investigated production incidents, applied temporary mitigations while identifying the real problem, and delivered root-cause fixes.
- Guided, corrected and reviewed the work of less senior engineers (new features, debugging, optimization, pull requests), and served as onboarding buddy for a new teammate.

Senior Full Stack Software Engineer | Siigo Jul 2022 – Apr 2025

Accounting and e-invoicing solutions for 300,000+ users · Bogotá, Colombia

- Contributed to improving response times across backend services and APIs using .NET microservices, Azure Functions, Kafka and gRPC, with event-driven communication patterns.
- Led the DIAN Annex 1.9 e-invoicing initiative end to end: requirements, system design, changes (Angular, VB), development, production release and monitoring of results.
- Peak-hour volumes of 12,000 to 60,000 transactions, with extra load on dates like Black Friday.
- Initiated the project for creating and managing accounting budgets (React).

- Contributed to CI/CD and DevOps practices with Azure DevOps, SonarQube quality gates (coverage, defects, code smells) and secrets management and rotation with Azure Key Vault.
- Used Azure Service Bus queues as a fallback to Kafka for microservice communication; worked with Azure SQL Database, Docker (local environment, E2E tests across microservices) and Kubernetes (deployments, scaling, troubleshooting).
- Supported teammates with code reviews and led the team when my manager was absent; agile teams.

Development Coordinator (Tech Lead) | Digitalware Feb 2021 – Jul 2022
Bogotá, Colombia

- Led 6+ developers, guiding the design, development and implementation of the main platform's applications, including NuGet packages and base applications.
- Proposed the annual roadmap and drove roadmap initiatives for the applications under my ownership.
- Mentored and coached developers, ran code reviews and enforced standards; contributed to technical decisions on API design, integrations and architecture.
- Introduced CI/CD with Azure DevOps, replacing manual deployments to on-premise servers, and managed application versioning.
- Documented the micro-application architecture of Ophelia Suite: 10+ (.NET backend, Angular frontend with DevExpress).
- Integrated other company products through microservices and Single Sign-On (JWT, OAuth2); implemented security requirements after an ethical-hacking review; designed and delivered new platform products.

Senior Software Developer (previously Junior) | Digitalware May 2018 – Feb 2021

- Led the Business Intelligence team and was lead developer of the company's BI application.
- Redesigned and optimized the platform's reporting module; integrated Google Drive as a data source.

Software Development Analyst | PIV Ingeniería Jan 2017 – May 2018
Bogotá, Colombia

- Redesigned a legacy ADO.NET application with no frontend into ASP.NET MVC (Razor) for the parking-control application.
- Built the API for the mobile app and developed the main database (functions, triggers).
- Delivered periodic software releases across 4 municipalities.

PROJECTS

Demo microservices platform | Personal project · GitHub

- Microservices architecture with asynchronous communication (RabbitMQ), REST and API Gateway.
- Observability with the ELK stack (Elasticsearch, Logstash, Kibana) and an Angular web client; fully containerized with Docker.

EDUCATION

M.Sc. in Computer Software Engineering | Broward International University 2023 – 2025
Specialization in Database Development | Fundación Universidad de Bogotá Jorge Tadeo Lozano 2019
B.Sc. in Systems Engineering | Fundación Universitaria Konrad Lorenz 2014 – 2018
Philosophy | Universidad Católica Luis Amigó 2008 – 2012

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Professional Software Architecture Course · Software Architecture Fundamentals
- Scrum Foundation
- In progress: Azure Administrator (AZ-104) and Azure Solutions Architect Expert (AZ-305)

LANGUAGES

Spanish: native
English: upper-intermediate (B2), able to read, write and communicate in professional settings
